

Consultancy for museums

Immediate consulting and short assessment of the use of mobile guide devices for museums, cultural landmarks and landscapes

The M2C Institute is one of the leading institutes in the segment for mobile media on national and European level and has specialized in the consulting, development and research of mobile media for museums. The M2C consults more than 40 partners from museums and cultural institutions all over Europe concerning issues of innovation, mediatization, communication and organisation as well as development and management of European cultural cooperations / projects along with a number of already successful implemented projects.

As one of the leading research institutes on the field of mobile media for museums we can offer you:

- Scientifically valid and neutral consultancy
- Consultancy by trained and recognized experts from science
- Short assessments at your house, e.g. short interviews with your employees
- Tailored to your requirements and possibilities
- Budget counseling on mobile systems for your house
- Report concerning the use of a mobile guide system
